

## Traffic Flow

During drop-off and pick up it is very important for the safety of our students that you follow traffic flow patterns. All motor traffic **enters** the school via the **west** entrance. If you wish to turn **west (left)** when leaving the school grounds then use the **front loading zone**. If you wish to **turn east (right)** when leaving then use the **back loading zone** for drop-off and pick-up.

Thank you for your compliance with this system and your heightened attention while driving on school property.
